

Skilled project manager with experience in the space sector

Space Inventor is looking to extend their microsatellite team with a skilled project manager in our HQ in Aalborg as well as our department in Copenhagen.

We are looking for an experienced Project Manager with an engineering background who is interested in space technology and in the management of large and small projects with international customers. It requires you to be self-driven, strong-willed, and have a versatile engineering background. Are you a person with an overview and courage in management, and would you like a job in the space industry and help set the standard for modern space technology, then we would like to hear from you.

About the position

If you have an interest in the management of space projects and you have experience with project management, this is definitely a position for you. You will be part of a project team with an office in Aalborg or Copenhagen, from where you will lead projects to customers from all over the world.

The project manager job at Space Inventor is a versatile and varied task, which includes communication with the customer, planning tasks with project teams, and coordinating with our factory of module manufacturing as well as satellite integration and tests before delivery.

We also take care of handling of launch, e.g. with the SpaceX Falcon rocket, and subsequent installation with commissioning in space and the daily satellite control.

We imagine that you are

- Highly motivated to lead the development of satellites from idea to rocket launch to delivery out into space
- Motivated by technical challenges and desire to solve problems
- Outgoing and feel comfortable about having meetings with customers and colleagues
- Solution-oriented and motivated to look beyond small problems
- You are self-driven and can take responsibility for your own work tasks
- Good at planning your and others' time
- Good at inspiring and motivating your colleagues on the team
- Able to communicate in English in both writing and speaking
- Educated in engineering and has a managerial background or similar
- A team player who is not afraid to use all the resources you have available

We offer

We offer you an exciting position within a dedicated team of space engineers as well as;

- A job in an exciting industry with a large international interface
- To become part of a growing company, with good opportunities to shape your position and the tasks you perform;
- Good colleagues and several social events a year;
- Health insurance, canteen scheme and other staff benefits

How to apply

If you are interested in applying for the position, please send an application and CV. to jobs@space-inventor.com. Interviews are held on an ongoing basis until the right candidate is found.
